Dear Zetta Team,

I'm an 11th-grade student in the System Programming track at the Technology School "Electronic Systems", and I'm writing because I'd love to join your summer internship program. Software is the field I want to build my career in, and I'm applying because I want to gain more practice, hands-on experience, and deeper knowledge, which is exactly why Zetta stands out to me.

Software is also where most of my experience already lives. For my project Struna, a real-time posture-monitoring system, I designed and built the entire mobile application from scratch, from the design itself all the way to the final working app and its connection to the device. I've also completed a backend internship at a software company and I'm currently part of the team rebuilding the official TUES school website. There's more detail in my CV, so I'll keep it short here.

What I'd really bring to your team is energy and curiosity. I'm full of ideas, I love helping the people around me, and I genuinely enjoy learning. Recently I also took on an organizing role for Hack TUES 12 and TUES Fest 2026, events that Zetta supported as a sponsor, which is part of why I already feel connected to your company. I'd love to grow in an environment like yours, and maybe, along the way, bring something of my own to it too.

I'm early in my path, but I learn fast and I'm serious about building a career in software. And there's nowhere I'd rather start that journey than with you.

Thank you for your time and consideration.

Sincerely,

Nikol Ivanova
